CHRONIC BACK PAIN MANGEMENT PROGRAMME

INFORMATION
FOR PATIENTS
AND REFERRERS

01536 492391
nhft.nhs.uk

MAKING A
DIFFERENCE
FOR YOU,
WITH YOU

HOW DO I KNOW IF I HAVE CHRONIC BACK PAIN?

If you have chronic back pain, it is likely you would have suffered with the following:

- Debilitating back pain for over six months, maybe years
- Medical interventions may have helped in the past, but you are now stuck at a level of pain that is still disabling day to day
- Often there is no identifiable cause for your pain or obvious reason for its continuation
- Your experience of pain severely disrupts your life and limits your activity

WHAT IS THE CHRONIC BACK PAIN MANAGEMENT PROGRAMME?

We focus on improving quality of life **despite** continuing pain. A selected group of eight to 12 back pain sufferers meet for three hours every week for nine weeks. This is followed by a three or six month follow up. The meetings are a mixture of discussion, practical advice and graded exercise.

The programme is run by an occupational therapist, physiotherapist and a clinical psychologist.

The programme is based on research evidence of what helps sufferers improve their lives and our outcome measures are very positive.

WHAT DOES THE PROGRAMME COVER?

We provide mutual support and time for discussion for people who have suffered back pain mostly in isolation and often being misunderstood by others.

We address the long-term effects: physical, emotional, social and occupational of chronic pain and plan constructive ways forward.

We work to identify the factors that improve and worsen the experience of pain, including vicious cycles, activity avoidance, low mood and hopelessness and social isolation.

The programme includes:

- Addressing physical exercise and mobility issues
- Addressing the impact of chronic pain on carers, partners and friends
- Developing practical coping strategies
Encouraging acceptance
- Enhancing independence
- Enhancing life enjoyment
- Learning relaxation and mindfulness techniques
- Managing sleep problems
- Promoting positive thinking

Each individual's experience of pain and associated needs are different. We aim to cover a wide range of issues so everyone gains something positive and useful from the programme.

HOW DO I JOIN THE PROGRAMME?

Discuss the possibility of joining the programme with your GP or other healthcare professionals you see for your pain management.
