

Northamptonshire

Health and Care Partnership

An Overview of the Northamptonshire
Health and Care Partnership (NHCP) for
NHFT Council of Governors

16 May 2019

What is Northamptonshire Health and Care Partnership and why have we created it?

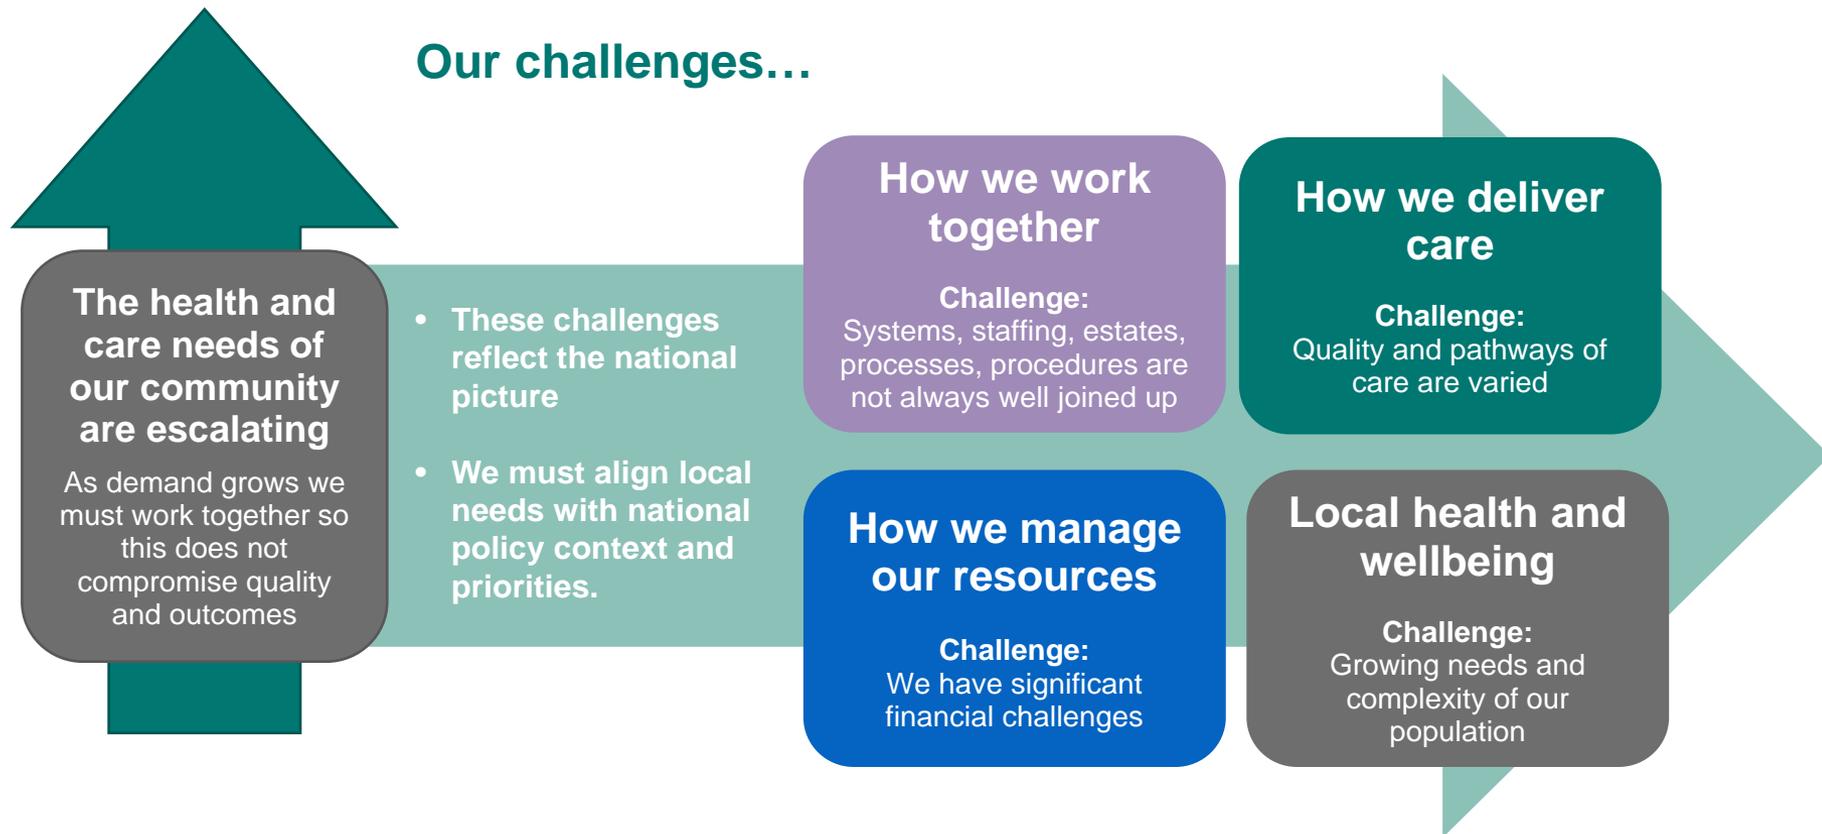

Northamptonshire health and care organisations are working together as **Northamptonshire Health and Care Partnership (NHCP)**

We have created the Partnership because we believe that it is only by working together across the various health and care organisations and providers across the county that we can meet the service and financial challenges facing health and care in the county.

- We all still exist as our own organisations or working groups
- We are committed to working together to ensure our health and care is sustainable and changes to meet our needs now and in the future.

Which are the drivers for change?

We are now seizing the opportunity to work together to address these challenges

What is our Vision for the Future?

Our **vision** for the future of Northamptonshire's health and care services is for a **positive lifetime of health, wellbeing and care in our community.**

Our **mission** in working together, the reason we do what we do, is to **empower positive futures.** Wherever we work and whatever our role we all want people in Northamptonshire to be able to **choose well, stay well, live well.**

Each day our **shared values** will help to guide our decisions and what is most important to us;

- Our patients and our local population come first
- We work together in an open and accountable way
- We trust, challenge and support each other
- We do what we say we will do.

What might this look like for people?

- Better **primary and community service** support for patients with high risks, so they are less likely to need urgent care

- **Unifying** how our **acute services** work together so you will get the best outcomes if you need these services

- More ways to support your **health and wellbeing in our community**

- Better access to GPs, primary and community care – which will mean we have less pressured **emergency and urgent** and care services

How will we work together to realise our vision?

Our staff, community and stakeholders all have a role to play in shaping how our health and care will transform. To support us through this we have brought together key groups:

- Our **Partnership Board** – made up of our chief executives and other leads oversees our work
- Our **Collaborative Stakeholder Forum** – made up of key local staff and representatives committed to ensuring that the views of the public, patients, service users, the voluntary sector and local government inform our work. They advise or Board on best practice.
- Our **Strategic Clinical Group** – make sure that our work will actually improve patient care
- Our **Strategic Finance Group** – make sure that our work makes best use of the money available.
