

CENTRE FOR NEUROMODULATION

UNDERSTANDING RTMS

An introduction to clinical repetitive transcranial magnetic stimulation (rTMS) for the treatment of depression.

rTMS is a NICE approved, alternative treatment for patients with Depression and Treatment Resistant Depression. This course is designed for healthcare professionals who want to know more about rTMS as a treatment, or who may be considering setting up a rTMS clinic. The day will give you an overview of what rTMS can offer as a treatment, who it may be suitable for, as well as a practical session looking at the equipment itself.
