Organisational  
Development

David Williams  
Director of Business  
Development

Non Executive Directors (NEDS) provide an independent perspective at Board level. They bring their particular experience and knowledge to enable scrutiny, constructive challenge, effective decision making and improved outcomes for patients, carers and families. They hold the Executive Directors to account for the performance of the organisation.

Executive Directors, including the Chief Executive, are responsible for the leadership and day to day management of the Trust. Each is accountable for a portfolio of activities.

Together with the non executive directors they form a unitary board of directors that is responsible for delivering quality services within the financial resources available by:

- Setting a robust and achievable strategy
- Ensuring that financial, operational and strategic objectives are met
- Identifying and managing strategic risks
- Setting and embedding organisational culture

The Board is accountable to its regulators, NHS Improvement and the CQC and to the Council of Governors and members.
