

Northamptonshire Healthcare NHS Foundation Trust, along with Medilink EM, is proud to be delivering high quality innovation support to businesses in, or transitioning into, the Life Sciences sector, via the following project:

## ACTIS

### Advanced Clinical Technology Innovation Support

- Covering the SEMLEP area
- Total project cost £1,299,564
- ERDF value £649,782
- Project runs until June 2019

Providing access to:

- Life Science sector specific expertise
- Cross-sectoral expertise from Universities
- Innovation Grants
- Networking

The project aims to increase the economic performance of the Life Sciences sector by enabling SMEs to improve their competitive advantage through innovation and stimulating interaction between businesses, research entities, and the NHS

Other delivery partner:

The Open University
